Avoidance objectives, ³, on the other hand, serve to protect against the threat, ³ or frustration ³ basic needs. According to Grawe, all agencies strive to consist, me. After an adjustment between internal needs (mental processes) and experience in reality (neural processes). At the next level, therefore, the so-called motivational schemes are ³ in the course of development, in interaction ³ the environment, in all people. Big Holtforth, M. GÄ ¶ ttingen: Hogrefe-Verlag. A license may have a jurisdiction³ as defined by the jurisdictions. It does not agree with the objectives of approximation ³ real experiences, the incongruity arises. The URL The creator of a job at a time, as the reuse ³ the attributes used. The repetition³ n: teaching and learning of books for the former writers in the psychologist psychotherapist ³ the child and adolescent psychotherapist. Discordant is then before, whether schemes or are, etc., depending on your experiences of socialization³ n. The greater the consistency, the guardian is the organism. Psychological therapy³ magic. In the third level, motivational objectives are compared with real perceptions (level of experience and behavior). As a general rule, both systems are at the same time active and the body strives for an optimal balance ³ all the motivational objectives ³ activated. That means motivational goals are not achieved. Therefore, there are people with particularly developed ³ avoidance goals and again, others whose approximation goals ³ exceed.
